

Community & Oral Health

Chronic Disease

Service Overview

Community and Oral Health (COH) in Metro South Health (MSH) provide a range of population and patient centred strategies with the aim of supporting patients to be able to live independently in the community.

Chronic Disease Team

Chronic Disease is a community based multidisciplinary, multi-sited team which offers education, information and support to adults with complex care and / or unstable or complicated diabetes, respiratory disease, chronic heart failure or following diagnosis of a cardiac condition with a strong focus on hospital avoidance and prevention of hospital re-admissions. The service provides care in the home or in a community setting including, group education programs, home visiting and phone consultation services for eligible patients.

The principal objective is to reduce risk of long-term complications, facilitate early discharge from hospital and reduce the risk of hospitalisation for patients with complex chronic disease conditions.
