

Community and Oral Health

Community and Oral Health Services provide a range of population and patient centred strategies with the aim of supporting patients to be able to live independently in the community. Services within Community and Oral Health include:

- Chronic Disease - speciality services in respiratory, cardiac and diabetes
- Nurse navigation and care coordination
- Refugee Health
- Dementia Outreach Service
- Acute Care@Home
- Rehab@Home
- Aged Care Assessment Team
- Southern Moreton Bay Islands Partnership Program
- Community Hospital Interface Program (CHIP)
- Medical Aids Subsidy Scheme (MASS)
- Queensland Voluntary Assisted Dying Support
- Metro South Voluntary Assisted Dying Support Unit
- Metro South Public Health Unit
- Redland Residential Care
- Oral Health

2025 Graduate Nurse Program

Chronic Disease & acute rotation program
 Graduates spend 6 months at either Brisbane South or Logan Chronic Disease service and 6 months with either PAH or Logan Hospital to complete a 12 month MSH graduate nurse program.

Benefits of the program

- Opportunities for a career in acute or community setting after 12 month graduate program.
- No night shifts in community rotation, most community teams work Monday to Friday in business working hours.
- Highly supportive program and work environment to support your transition.
- Access to the MSH graduate nurse program and study days.

Aim of the Graduate Program

- Welcome and support new nurses into a growing area of clinical practice.
- To develop confident and competent graduate nurses.
- Equip the graduate nurse with skills and experience to work either community or acute health facilities as a competent nurse.
- Connect graduate nurses with high calibre nurse preceptors and mentors.
- Develop leaders of the future.
- To provide a supportive transition from student to autonomous nurse.
- To foster excitement and enthusiasm for continuing their nursing career.
