What is it like to work on 3C?

Cardiothoracic is an interesting and complex speciality which involves complex surgical interventions and significant comorbidities.

It is an exciting specialty with a dynamic team who strive for excellent patient outcomes. Our nursing team are invested in developing new staff so that they become expert clinicians.

Nursing staff on 3C develop a wide variety of surgical nursing skills including:

- Management of intercostal catheters
- Dopamine, heparin, amiodarone, heparin, and insulin infusions
- Wound management including VAC assisted therapy and sternal packing
- Pain management including PCAs and regional infusions
- Central line management
- Drain management
- Pre and post-operative care
- ECG and rhythm interpretation
- Indwelling catheter insertion and management
- Nasogastric tube insertion and management
- Patient education
- Cardiac surgery rehabilitation strategies

Cardiothoracic Surgical Procedures

- Coronary artery bypass surgery
- Pneumectomy
- Transcatheter aortic valve replacement (TAVR)
- Cardiac valve repair
- VATs (Video Assisted Thoracoscopy) and pleurodesis
- Wedge resection
- Lobe resection/biopsy
- Decortication
- Bronchoscopy
- Mediastinoscopy

Hospital initiatives

- Magnet®
- Commitment to Reconciliation
- Digital Hospital
