Issue #24, 18 July 2019

Redland Hospital's tiniest patients are enjoying the latest in technology thanks to the delivery of two brand new Giraffe Incubator Care-stations.

Special Care Nursery A/NUM Amanda Curley said the new cots were wider and featured a rotating table, built-in scales and an air curtain to maintain the internal temperature when the door was opened.

She said the cots could also be lowered to allow better visual and physical access for parents seated at the bedside.

Director of Paediatrics Dr Dougie Thomas said the new cots also enabled babies to be

repatriated back to Redland Hospital from 32 weeks instead of 34 weeks which was a step forward for local families.

New cots providing hi-tech care for premmies

July's Digital Top Tips

Ordering an IV Sequence

IV Fluid - Day 1 - 1	
<input type="checkbox"/> Sodium Chloride 0.9% intravenous infusion 1,000 mL Rate: 125 mL/hr, Total volume (mL): 1,000, 1,000 mL, IV continuous infusion, start: 07/01/18 15:15:00 AEST, stop: 07/01/18 23:14:00 AEST, order duration: 1 bag(s) Administration Information Sodium Chloride 0.9% IV	Pending Not given within 5 days.
<input type="checkbox"/> Potassium Chloride 20 mmol in Sodium Chloride 0.9% intravenous infusion 1,0... Rate: 125 mL/hr, Total volume (mL): 1,000, 1,000 mL, IV continuous infusion, start: 07/01/18 23:15:00 AEST, stop: 08/01/18 07:14:00 AEST, order duration: 1 bag(s) Administration Information Sodium Chloride 0.9% with KCl 20 mmol/L	Pending Not given within 5 days.
<input type="checkbox"/> Sodium Chloride 0.9% intravenous infusion 100 mL Rate: 250 mL/hr, Total volume (mL): 100, 100 mL, IV continuous infusion, start: 08/01/18 07:15:00 AEST, stop: 08/01/18 07:38:00 AEST, order duration: 1 bag(s) Administration Information Sodium Chloride 0.9% IV	Pending Not given within 5 days.

Ordering multiple bags of Intravenous fluid?

Ensure you use an IV sequence when ordering multiple bags of fluid in the ieMR. The IV sequence groups the bags on the MAR and ensures only the next fluid order is available to commence as per the prescribed sequence. Refer to Metro South Health for QRGs and training videos on creating fluid Sequence

Need to Locate an ARP?

A documentation filter is the most efficient way to locate ARP. Have you got your filter set up? Refer to the QRG Documentation: Locating an ARP for assistance with setting up the filter. Other helpful documentation filters include consents, legal documents and obstetric documentation.

Reminder of the After hours Digital Hospital Support

The Digital Hospital Adoption Services team are on-call Monday to Sunday (including Public Holidays) for support enquiries and concerns regarding the
