These resources were developed in partnership with QUT with extensive consultation with Brisbane African women from a range of countries. The easy English readers were created with the support of TAFE Queensland English Language and Literacy Services (TELLS) and used in their Adult Migrant English Program. For many African women, English is the first language they learn to read. Please note these resources were updated in 2015 to be consistent with the new national [Infant Feeding Guidelines](#).

All resources are available online at: <https://metrosouth.health.qld.gov.au/multicultural-nutrition-resources>.
