NEW EYES,
ENHANCED VISION

Insight program for Graduate Nurses and Midwives

About the program

Metro South values a graduate's perspective on how we as an organisation can improve our care, delivery and experience. We recognised that our graduates were an untapped potential when it came to innovation and were eager to provide them with a platform to showcase their visions.

The Insight program is an initiative that all Metro South graduates get to participate in during the first year of practice. Graduates are provided with an opportunity to identify something that they would like to improve and are supported throughout the year to roll these initiatives out.

Since its commencement in 2017, Metro South has had over 100 graduates initiate nursing and midwifery quality initiatives across a large area of Acute Care, Medical, Surgical, Rehabilitation and Women's and Children's.

Each year the graduates continue to raise the bar, promoting initiatives that not only align with the values of the hospital and profession but revolutionise the way we go about our business.

The Insight program provides graduates with the opportunity not only to initiate implement and evaluate a quality initiative project but also to gain a deeper understanding of organisational initiatives, participate in shared decision-making and have a voice within the organisation.
