

## Construction notice

### Buranda busway station - September 2022

#### Major construction works commencing

**Brisbane City Council is delivering the turn-up-and-go Brisbane Metro – a new era of connected transport.**

As part of Brisbane Metro, Buranda busway station will be upgraded and extended to cater for the new battery electric metros and improve busway operations.

From **September 2022 to mid-2024**, major construction works will be delivered. Works include:

- piling, excavation and concrete works
- removal of part of the existing busway tunnel structure, tunnel widening and bus platform extensions
- removal of the existing station plaza and bridge deck, and installation of a new bridge deck
- relocating underground services
- footpath, pavement and station reinstatement works.

Works will be undertaken on O'Keefe Street between Carl Street and Gillingham Street, and at Buranda busway station, both at platform level and within the station plaza forecourt.

#### What to expect

- **work hours** – (both standard and out-of-hours):
  - standard construction hours: between 7am and 6pm Monday to Friday, and 8am and 1pm Saturday
  - out-of-hours: between 7pm and 5am, Sunday to Thursday.
- **construction activity** – road saws, jack hammers, vacuum excavators, excavators, piling rigs, cranes, compaction equipment and other construction equipment.
- **noise, dust and light** – from the site compound and laydown facility, construction machinery and vehicles.
- **traffic changes** – lane closures will be in place on O'Keefe Street between Carl Street and Gillingham Street, with a detour in place.

- **pedestrian and cyclist changes** – detour routes will be in place with access to the busway station platforms maintained. Traffic management will be onsite to provide direction, where required.
- **bus route 203 (towards Carindale) detour** – this service will detour via the busway. Route 203 will continue to service all existing stops and minor delays may be experienced.

**Please refer to the map over the page for the key traffic, pedestrian and cyclist detours that will be in place from Sunday 18 September 2022 to late 2023.**

Works within the busway will mostly be undertaken outside of operational hours. At times, single lane closures within the busway will be required at night. During the single lane closures, there will be no impact to Translink bus service stops or timetables.

Occasionally, full weekend shutdowns will be required to facilitate critical works. Where full closures are needed with bus detours in place, advanced notice will be provided. The project continues to work closely with Translink to manage these impacts.

Every effort will be made to minimise the impact of these works on nearby businesses and residents.

Additional works may be required, subject to weather and site conditions.
